

Dr. Frank Jackson - Senior principal research scientist, Moredun

Speaker; Anthelmintics and resistance, responsible approaches to control. Friday 25 September, 16.00-16.30

Frank Jackson is a senior principal research scientist in the parasitology division at Moredun.

His research interests include sustainable approaches to the control of nematodes as well as anthelmintic resistance, the use of bioactive forages and the interaction between nutrition and immunity.

He acts as a consultant for antiparasitic trial work undertaken by Moredun Scientific and to some of the major pharmaceutical companies.
