Making a difference
to the future of dog health and welfare

SUBMITTING DATA ON CONFORMATION ALTERING SURGERIES AND CAESAREANS

It is important to submit data to the Kennel Club of any conformation altering surgery or caesarean conducted on a Kennel Club registered dog. This will build a picture of the current situation and help introduce measures to improve health and welfare for future generations of dogs.

Submitting data is easy – use the new quick online submissions system
www.thekennelclub.org.uk/csections

REMEMBER

🐾 This is about improving dog health and welfare for future generations
🐾 When an owner registers their dog with the Kennel Club they agree in advance to share data on their dog’s conformation altering surgery or caesareans
🐾 If the caesarean was not linked to a hereditary cause, the data is still useful and should be submitted

TOP TIPS

🐾 Use the new quick online submissions system, it takes two minutes – www.thekennelclub.org.uk/csections
🐾 Clients may worry if you tell them you are going to “report” the data, so consider using softer language such as “submit”
🐾 If you don’t know whether a dog is Kennel Club registered discuss making it practice policy to find out when the dog is first presented, so you already have this information on file
🐾 Discuss with your practice manager about making submitting data part of practice policy – and stick this poster up in a handy place as a reminder!
